

Frascold®

Compressors and Solutions for the HVAC/R Industry

An Italian product widely accepted throughout the world

Screw compressors

- Range from 15 to 1600 kW
- 7 main series
- 67 different models
- Operation with frequency inverter

Innovative design
New and exclusive design of screw profile
integrated system for oil management
Heavy duty bearings
Hi-Tech electric motors.
Eco Friendly models for Hydrocarbons

These features offer significant benefits to our customers: improved performance, smooth running and low noise, the very best of Frascold design and engineering for modern refrigeration and air conditioning systems.

Semi-hermetic reciprocating compressors

- Range from 2 to 750 kW
- 14 main series
- 156 different models
- Eco Friendly models for Hydrocarbons and CO2
- Operation with frequency inverter

Compact
Low noise
Smooth operation
Extremely competitive.

A perfect project solution, incorporating the very best manufacturing technologies. Ideal for all applications: refrigeration, air conditioning and heat pumps
